About

Ammonia Europe is the business association representing the interests and supporting the growth of the ammonia industry in Europe.

Ammonia Europe leads the policy, technical and safety debate around the role of ammonia as a critical molecule for the food and chemical sectors as well as a decarbonisation vector and fuel for energy and maritime applications in Europe's net-zero and resilient economy.

Vision

By 2050, we envisage a decarbonized ammonia industry and uptake of clean ammonia across various sectors of Europe's climate neutral and resilient economy.

Mission

Promote the role of ammonia as a precursor of multiple value chains and reliable decarbonisation vector for Europe's net-zero and resilient economy

Advocate towards EU institutions and Member States to decarbonize existing assets and foster a fair and cohesive policy framework in Europe

Connect a broad range of companies involved in the European ammonia market to support development of a sustainable and competitive ammonia sector in the EU

Act as a trusted partner and a reference point for EU stakeholders regarding the benefits and safety of ammonia

Promote R&D&I for low carbon and renewable ammonia technologies in the EU

Certification working group

Governance

Secretariat

Activities

Knowledge

Gain expertise on ammonia handling, safety, environment and technologies

Policy Influence

Ensure your voice is heard when the relevant EU policy is being shaped

Certification

Shape and use our proprietary ammonia certification scheme

Networking

Access events that connect you to the full ammonia value Chain

Communication

Stay up-to-date with the latest ammonia developments through our insights

Proprietary Certification Scheme

Product scope

Ammonia

Production of ammonia:

- Hydrogen from water electrolysis
- Steam reforming of biomethane
- Steam reforming of natural gas + CCS

Sustainability Attributes Tracked

Carbon Footprint

Carbon Footprint (CFP) Scope:

- Well-to-production-gate
- Additional Well-to-supply-gate with Mass-Balance

Origin

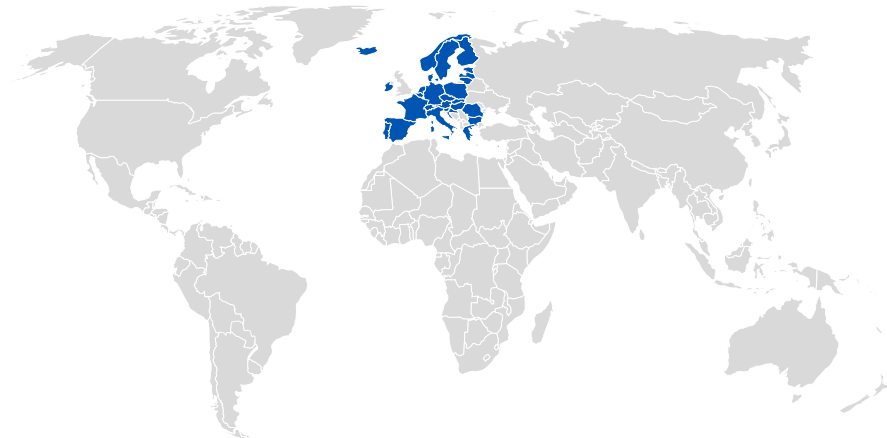

Renewable-bio

Renewable-non-bio

Non-renewable

Geographical scope

End-use in the European Single Market (ESM).
Production anywhere in the world.

Chain of Custody

Mass Balance

Or optional restricted Book & Claim within ESM domain & same company

Product attribute declarations

NH3 certificates

Status

- Pilot concluded
- Ready for roll-out
- Scheme documents published on Ammonia Europe website

Pilot auctions performed by

Membership sectors

Ammonia producers

- Large ammonia producers that own an annual ammonia production capacity that is equal to/exceeds 1Mt/y
- Small ammonia producers that own an annual ammonia production capacity that is equal to/exceeds 50,000 tons but does not exceed 0,5Mt/y

Logistics

- Ports: key infrastructure to transport and store clean ammonia.
- Companies involved in energy storage via ammonia
- Companies involved in clean ammonia transport via pipelines/ships/train.

Technology providers

- Developers, engineers and manufacturers of ammonia synthesis technologies, as well as pioneer developers of novel technologies

End-user

- All producers of fertilizers products
- All producers of technical and other products based on ammonia
- Shipping sector, energy companies and other sectors exploring the use of ammonia as fuel
